

# FIRE ISOLATOR

## Datasheet Fire Isolator Backpack

### Product description

The T-ISS FireBlanket backpack is a portable and efficient solution designed for carrying our Fire Blanket by one person. This way, the blanket does not have to be carried by two people.

With a weight of approximately 40 kg when fully packed, this backpack can be comfortably carried by an individual, thanks to its ergonomic design, padded straps, and internal compartments that keep the blanket securely in place.

### How to use

1. Place the bag with blanket in the front or behind the car.
2. Open the bag fully and pull the blanket out.
3. Unfold the blanket in the width, the green loops must be at the top.
4. Take the green loops for the first part of covering the car lengthwise.
5. By pulling at the green loops, the first half of the car is covered.
6. Take the red or yellow loops (depending on which one is above) for the second step.
7. Pull the second part of the blanket over the car with a wave.
8. Straighten the blanket to make sure the blanket touches the ground around the car.
9. Moisten the blanket to make it nearly gas and smoke tight.
