

FIRE ISOLATOR

Datasheet Watermist Applicator 36

Product description

The Mobile Watermist Applicator 36 is a lightweight, 9.5 kg watermist tool by Fire Isolator. It is designed for efficiently handling EV fires in confined spaces, such as parking garages and ferries, where cars are parked closely. Its extended length offers better coverage along the sides or underneath burning vehicles.

With 36 nozzles, The Watermist Applicator 36 sprays a fine mist that rapidly cools the vehicle while creating a protective barrier from the heat for the operator. This makes it easier to manage the fire and protect responders before deploying a fire blanket.
