

# FIRE ISOLATOR

## Datasheet Fire Isolator Backpack

### Product description

The Fire Isolator backpack is a portable and efficient solution designed for carrying our Fire Blanket by one person. This way, the blanket does not have to be carried by two people.

With a weight of approximately 40 kg when fully packed, this backpack can be comfortably carried by an individual, thanks to its ergonomic design, padded straps, and internal compartments that keep the blanket securely in place.

HS code: 39219029

### Pictures

Our Fire Blanket Backpacks have no expiration date, they have a shelflife of 25 year+ when properly stored.

### How to use

### How to use

1. Place the backpack near the front or back of the car.
2. Open the bag completely and remove the blanket.
3. Unfold the blanket widthwise, green loops on top.
4. Use the green loops to start covering the car lengthwise.
5. Pull the green loops to cover the first half of the car.
6. Use the red/yellow loops (whichever is on top).
7. Pull the second half of the blanket over the car with a wave motion.
8. Adjust the blanket so it touches the ground around the car.
9. Moisten the blanket to seal it against gas and smoke.
