

# FIRE ISOLATOR

## Datasheet Lithium Battery Cover Ultra FI-PALCO

### Product description

Lithium Battery Storage Fire Covers are a durable and highly effective solution for isolating lithium battery fires. Designed for warehouses, logistics centers, and other storage facilities, they help contain dangerous goods and support compliance with regulations and insurance requirements.

When deployed, either preventively or during an incident, the cover contains the fire, preventing its spread and minimizing collateral damage. The ULTRA cover is reusable, washable, and suitable for multiple deployments. It withstands peak temperatures of up to 2050°C and has a continuous operating temperature of 1400°C.

The covered pallet can remain in place or be safely moved using forklifts and pallet trucks, allowing rapid relocation to a designated quarantine or safe area.

### Dimensions & Specifications

Art. no:	FI-PALCO
Dimensions:	1260mm x 860mm x 1165mm 1260mm x 1060mm x 1450mm Available in custom-made sizes, ask for advise/ quotation
Weight:	9 kg
Material:	96,6% Highest quality Silica, graphite coating
Temperature resistance:	+2050 °C Peak
Classification:	DIN EN 13501-1 classified with A1 certificate by KIWA/ MPA, ASTM D6413 classified by HPL Engineering NFPA701 by SGS, DIN SPEC 91489
HS code:	70199000
Usage:	reusable

Also available in custom-made sizes.

### Pictures

- The pallet cover can be combined with our automated and manual aerosol suppression technology
- Supplied in sturdy smartbag
- Cabinet available
- Big coloured loops for easy handling of the blanket
- No expiration date, shelflife of 25 year+ if properly stored

\* The blanket has a tolerance of +/- 5% in width and length, which can be affected by temperature and moisture.
